Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Applicant's election of the invention of group I, claims 33-51 drawn to a method of in vivo delivery of a peptide that binds to opioid receptor to a patient by administering allogeneic muscle cells in Paper filed 9-8-2003, with reverse, is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).
2. However, after further consideration, it was determined that the elected invention is subject to further restriction as discussed below.

Election/Restriction

3. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 35-51, drawn to a method of in vivo delivery of a peptide that binds to opioid receptor to a patient, classifiable in class 424, subclass 93.1.
 - II. Claims 35-51, drawn to a method of in vivo delivery of a peptide that interferes with binding of substance P to its receptor, classified in class 424, subclass 93.1.
4. The inventions are distinct, each from the other because of the following reasons:

The inventions of group I and II are patentably distinct, one from the other, because they are drawn to materially different genes and methods of using such. The invention of group I is directed to a peptide which blocks opioid receptors whereas the invention of group II is drawn to a peptide which blocks binding of substance P to its receptor. Although, blocking the binding of both, the opioid and

Art Unit: 1632

substance P receptors to their respective ligands results in analgesic effects, the *in vivo* mechanisms of actions of opioid peptides and substance P are distinct .

Because these inventions are distinct for the reasons given above, have acquired a separate status in the art shown by their recognized divergent subject matter, and because each invention requires a separate, non-coextensive search, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
